

INTERCEPTOR 9000

SEALEGS®
BE AMPHIBIOUS

The Interceptor 9000 is the result of intensive R&D aimed at providing the same state-of-the-art amphibious technology our customers have come to expect with a full two metres more space.

The massive 9 metre craft is powered by a 300HP outboard, has room for eight Joltrider suspension seats and features all of the advancements found on the latest Sealegs models.

The Interceptor 9000 is the perfect solution for those potential amphibians craving a larger craft.

Sealegs Amphibious Enablement System (AES)

AES provides a fully integrated, turn-key amphibious package.

- Hydraulic transmission powered by a 35HP Honda engine
- AWD all-wheel drive
- XRT xtended run time
- ABS automatic braking system
- PS power steering for land and water
- Dash mounted control panel
- Marinised hydraulic lift and drive system
- Heat treated cast marine alloy legs
- Dual battery system

Specifications

Length (wheels up)	9.0m
Beam Overall	3.0m
Height (wheels down)	2.45m
Dead rise at transom	23 degrees
Dry Weight	2240kg
Fuel Capacity	250 litres
Top Speed on water	42 knots
Speed on land	7kph
Max Payload	500KG

Popular Options

Fusion stereo	Joltrider seats
Simrad GPS/chartplotter	Anchor pack & Windlass
Simrad VHF radio	Bow camera
